

Key Feature / Drum Litter Bin

Design variations

Drum litter bin can be supplied with either a hinged door to allow access from the side or alternatively as a complete drum with access to the liner from the hinged rim. The top loading option does not permit provision of the lid.

Materials and finishes

Plinth, rim and optional lid come in 304 grade stainless steel with a peened and electro-polished finish as standard. The Drum can be supplied in the following options:-

- grade 304 Stainless steel with peened and electro-polished finish.
- mild steel with galvanised or powder coated finish.
- Corten steel, pre-patinated and with the option of a sealing coat

Medium density black polyethylene liner

Fixing

The drum is bolted to the plinth which itself has bolt down fixings for a pre-installed below ground foundation.

Size and weight

Standard dimensions of 1005 high (including lid) x 490 diameter.

48 kg overall weight (including lid)

Capacity

95 litres
