

Key Features / Treadplate Tree Grille

Design Variations

Treadplate tree grille comes as standard 1200 square, although any reasonable size and shape can be made. The grille can be supplied either in powder coated or galvanised steel, or in stainless steel and in each case the size and shape of the central aperture can be varied. The patterning of drainage holes can also be varied.

Materials and finishes

Mild steel with a galvanised or powder coated finish to most RAL colours. A 304 grade stainless steel version is also available.

Fixing

Treadplate comes in two halves with its own edge restraint. Both the edging and grille are bolted down into pre-installed concrete footing.

Size and weight

Standard dimensions of 1200 wide x 1200 long x 60 deep.
62 kg overall weight.
